TRANSPORT MANAGER

Transport Management Software is a popular Enterprise Resource Planning (ERP) system which integrates all data and processes of a transport company into a unified system. TRANSPORT MANAGER is a comprehensive transport Management Software used by Transport Companies and other consultancies related to transportation to streamline their entire organization and functioning. It provides technology solutions for better organizational management, thereby leveraging IT for efficient management of Transport Companies.

The administration of Transport companies is a tough and demanding one. It involves collecting, storing and sharing of mounds of data, which is a laborious and tedious task. It is also time consuming and prone to human errors when it is done manually. Worse still, retrieving a particular data can be a pretty grueling and taxing thing.

Developed in close coordination with experts after an in-depth analysis of the requirements of Transport Companies, TRANSPORT MANAGER provides all that you need for the smooth functioning of these organizations. It is a comprehensive, all-encompassing organizational management system, which connects all the areas and processes of an organization in a single-point integrated platform. This single point integrity makes maintaining, updating and retrieving of data easily.

TRANSPORT MANAGER is all-inclusive company management software that covers each and every activity of an organization and helps you to organize the various aspects such as maintenance of Staff and Client Records of the organization. Staff Records include personnel profile. Staff Registration, Attendance calculation, Payroll Management etc will also be provided. Client Records includes every information required from that client to this organization including Client Registration, Expenses, etc.

With TRANSPORT MANAGER you don't have to grapple with the difficult, cumbersome and time consuming task of managing records as it reduces, if not eliminates, paperwork. The automation of information management saves resources, man-hours and money - the time and resources which could be spent on more important tasks. Timely & accurate data plays a crucial role in making sound policy decisions. As you have quick and easy access to up-to-date information, TRANSPORT MANAGER also helps improve strategic decision making in your organization.

By automating the administrative tasks, TRANSPORT MANAGER helps in the day to day administration of the organization, and improves efficiency in working, and the way an organization functions. A number of organizations have reaped the benefits of our TRANSPORT MANAGER which effectively brings information technology and management of an organization together.
